KANSAS CUSTOMERS TO THE FRONT

Situation and Outlook of Trade Good in Lines of Apparel,

BUT POOR IN ALL EATABLE LINES

OFFICE OF PIFTSBURG DISPATCH, TUESDAY, March 12, 1888. The spring opening of the wholesale mil-The spring opening of the wholesale millinery trade last week, was the most encouraging sign of the times, that the commercial reporter of The DISPATCH has discovered this season. It is pleasant, after hearing daily complaints of the deadness of trade to find a department where the sunny view is taken. Come what will, the millinery jobbers of Pittsburg never fail to have their spring opening the first week of March, Then the season's styles are shown to retail dealers, who come from all surrounding towns to equip themselves for the coming campaign, receive pointers as to fashions, and how to use materials for new styles of head gear. Reports of last week's opening are most encouraging.

Following is the statement of one of our jobbing millinery firms: "We have never had as satisfactory an opening or a better outlook for for trade. Sales were not so very large last week and we did not expect this. The aim of our

is to get our customers here, show them goods, make the impression which will bring in orders from now on till June. On the three opening days we were thronged every day, and all linery trade last week, was the most en-

make the impression which will bring in orders from now on till June. On the three opening days we were thronged every day, and all hands were as busy as bees showing goods and styles. Our customers came from as far East as Altoons and West as Crestline. Already we begin to see results of the opening in the orders coming in, and you may put it down for our branch of trade that there will be no falling off this season, but a gain. The situation and out-look for our business was never better at this

ime of the year.

A member of another jobbing firm spoke in A member of another jobbing firm spoke in the same strain, and stated, among other things, that a new customer from Kansas was present at the opening and left a comfortable order for goods. It was pleasant to hear that a retail millinery establishment beyond the Mississippi should be furnished by our city of heavyweight industries in preference to Chicago, St. Louis and Cincinnati.

To send glass, rails, locomotives and such like to the far West was glory enough, but thanks to the enterprise of our jobbers we begin to send feathers, laces and other paraphernalia that go to crown the ladies of the land.

Dry Goods.

The season is scarcely far enough on to furnish satisfactory pointers of the prospects in wholesale drygoods lines. Trade so far shows no falling from last season. In fact, the vol-ume of business has been better than a year ago at this time, and that season was an improvement on the previous one. The time is here when the spring trade should be under full headway. Rough weather the past week has checked the movement of trade, but a more hopeful feeling begins to spring up as the skies begin to brighten. A few days of bright weather and a settling of country roads into a passable condition is expected to bring the activity to trade which has not falled from year

is in the line of materials for the inner It is in the line of materials for the inner man that dealers complain most of this spring. The earth was too bountitul last season for the producer, or produce dealer. But in the line of goods for the comfort and adornment of the body, the feeling among jobbers generally is that trade is fair and outlook good.

This fact has been developed by frequent interviews with jobbers in woolens, clothing, gents' furnishing goods.

gents' furnishing goods.

The closeness of margins is generally complained of in these lines of trade, but volume shows an increase on last year or former years, and unless jobbers are far astray in calcula-tions, a good year for trade is before us.

The Belgian Iron Trade.

It appears that 681,663 tons of refining and foundry pig iron were produced in Belgium during the year 1888, of which 9,800 tons were exported. The remainder, however, did not suffice to cover the consumption of the country, and 212.813 tons of pig iron and 25,211 tons try, and 212.818 tons of pig iron and 25.211 tons of old rails had to be imported by the Belgian Iron Works. The bar and sheet mills produced 548,655 tons, as against 582,103 tons in 1887. The Belgian Iron Works continue to compete successfully in distant markets, and it is said that the Cockerill Company recently secured a contract for 50,000 tons of rails in the Argentine Republic. One of the steel works has obtained an order for 700 tons of rails for China, but it is supposed that this contract has been sub-let by a British firm.

DIAMOND ALLEY PROPERTY IN DEMAND

The most important real estate transaction that has taken place in Allegheny City for some time was consummated yesterday. The fine residence property—the building of modern construction, and large lot-of Mr. Robert Marshall, on Western avenue. was bought by Mr. John Walker for \$55,000. He will move into it in a short time. Considering the eligible location of the property on one of the finest avenues of the city, the price is considered very reasonable. It is understood the agents in the transaction were Messrs. James W. Drape & Co.

County Engineer Davis has finished his annual report to the Commissioners and Con-troller, and it is now in the hands of the printer. Concerning the bridges of the county, of which there are rearly 200, he says they are the best in the State and generally in good condition. He recommends for renewals, new work and repairs about \$100,000, of which sum the Commissioners have allowed \$65,000. Of this amount \$16,000 will be expended on the Neville Island bridge. The rest of the money will be mainly expended in repairing and painting old ones. There is a necessity for a number of new bridges, but they will not be built this year on account of lack of funds. While Engineer Davis speaks highly of the bridges, he says the roads are the worst in the State, falling far below the requirements of the business of the county, and while the present law exists he ex-pects no material improvement. He favors a new law that will place the roads under the control of a responsible head, and making it obligatory on him to keep them in good condi-

The New York Graphic is considerably worked up over the meat question. As this is a subject of great interest to Pittsburg, what the paper says is herewith reproduced: "Between the dressed beef bills, the woeful cries of cattle ranchmen, the coming inter-State convention of cattle producers and the forma-tion of a new meat combination, the public is slowly waking up to the fact that the prices paid for beef in retail markets is sufficient to yield big commission profits to a dozen middle-men. The cost of beef on the hoof on the range is scarce one-seventh what it is sold for on the block. An \$18 or \$20 range steer brings from \$125 to \$135. There are feeding, slaughter-ing, freight and other expenses to be consid-ered, but even when all are taken into account the meat sells at a ratio to cost of three or four to one. There is little wonder that new com-binations are formed to handle meat when binations are soing.

Members of the Petroleum, Stock and Metal Exchange, after the close of business yesterday afternoon, had a meeting to take action to defeat the tax bill pending at Harrisburg. President Arter called the meeting to order, and Henry M. Long, Chairman of the Committee on Resolutions, presented a report to the effect that if the State is in need of revenue, a license of \$50 on all brokers in lieu of all other taxes on the business would be acceptable to them: or, say, a tax of 5 mills on net receipts instead of on gross earnings, as proposed. The report was adopted. W. S. Arter, W. I. Mustin and Henry Sproul were appointed a committee to go to Harrisburg and argue the case before the Committee on Ways and Means.

"Do you know there is a big demand for property on Diamond alley?" remarked a real estate dealer yesterday afternoon. "At least \$100,000 worth of property on that thoroughfare between Smithfield and Market has changed hands within the past two months, and I know of several dickers that have not been brought to a head. I am not at liberty to give names, but what I have told you is straight. I look for Diamond alley to become one of the best streets of the city."

At the afternoon call 40 shares Switch and Signal sold at 23%. Henry W. Long sold 200 share Electric at 47, and 100 Central Traction at 22%. The total sales of stocks at New York yesterday were 152,365 shpres, including Delaware, Lackawanna and Western, 14,900; Erie, 4,300; Lake Shore, 4,300; Louisville and Nashville, 6,300; Northwestern, 3,700; Reading, 34,000; St. Paul, 27,400; Union Pacific, 3,400; Western Union, 26,000.

Oil Seeks a Lower Level in Spite of Bullish Statistics. The oil market yesterday was the dullest of the year. Trading was very light all round and the range of prices very narrow—scarcely sufficient to give dealers a chance to turn an sufficient to give dealers a chance to turn an honest ponny. The first price was 91½, the highest of the day. From this point the market sold down to 90%, the liowest. Toward the close the feeling was a little stronger and the quotation was advanced to 91½. The final figures were 91½. A radical change is looked for during the month, but whether it will be for better or worse is an unsoluable problem. The situation was never more bullish.

The original vineyand of 75 acres was planted in Mission vines, soon after the first discovery of gold, by an old Frenchman named Gerke. The vines to-day, although 35 years old, are still vigorous. The trunks are as thick as a man's leg. The yield of grapes last year was nine tons to the acre, The chief foreign varieties planted at Vina are the Berger, White Chasselas, Reisling and the Napoleon for white wines, and the Zinfandel and Trousseau for clarets. The vinevard is divided into fields of 500 acres each. Every modern appliance for the manufacture of wine is provided by the Senator, but the product is far from choice. The cellars at Vina are large, and the blant is capable of handling 40 tons of grapes per day, an equivalent of 12,000 tons, or 24,000,000 pounds, for the season.

New York, March 12—Buyers are cautious, because of the large quantity of ginghams that are thrown upon the market at slaughter prices. A drive in five fine dress ginghams of the 10%c grade was made to-day by Tefft, Weller & Co. at 7%c, at which price the goods were rapidly absorbed. Business with agents continues moderate, but prices are unchanged, and for the most part firm. There is no indication of agents yielding. The tone is slightly firmer in some directions.
